La vie solitaire by Francesco Petrarca

Francesco Petrarca

Cet éloge de l. a. solitude est aussi un manuel chrétien de los angeles vie lettrée. Elle s'écoule loin de l'agitation des villes, dans los angeles dialog de l'âme avec elle-même, avec les livres, avec de rares amis. Ordonnée aux fins dernières, le repos en Dieu, elle désigne les vraies richesses où s'allient méditation des textes, écriture, prière, présence apaisée de l. a. nature. Ainsi se gagne l'unité avec soi-même. Voici le most desirable programme de l'humanisme naissant, l'aveu inédit d'une judgment of right and wrong littéraire du monde.

i believe fortunate that the los angeles library had this text, simply because my La vie solitaire different selection used to be the used replica to be had from Amazon for \$399, and well, that is a whit at the expensive side. Additionally, the one translation to be had appears this 1924 variation by way of Jacob Zeitlin - and that i ask yourself what a extra glossy translation of the Latin may possibly glance like. Nevertheless, Zeitlin writes a enjoyable and elucidating advent to "De Vita Solitaria" that La vie solitaire pretty well captures the spirit of the thing: it really is an "elaborate and redundant book. Its argument winds and wanders and infrequently forgets itself altogether." It definitely does. however the basic argument is La vie solitaire clear: the busy urbanite suffers a depressing life, producing not anything important, whereas the years of the solitary countryman are brimming with wealthy normal pleasures and meditations on philosophy and God. in the urban lies the impulses of the flesh, whereas seclusion within the mountains and valleys makes it possible for freedom and purity of the mind. e-book One. 5 Stars. i presumed this part used to be humorous (unintentionally I think), apt, splendidly vivid, and nonetheless held (mostly) real to fashionable life. the extraordinary nature of Petrarch's perspectives on urban existence are hyperbolic, yet they're additionally precisely how I occasionally feel. For instance, the town dweller is "full of troubles, replete with eating and wining, gripped via worry and envy, dispirited by means of the tests he has encountered or vainly elated through his successes, troubled with melancholy, bursting with wrath, at warfare La vie solitaire with himself, no longer grasp of his personal mind. he's besieged through parasites, spied upon through rivals, deafened with outcries, importuned via letters and besieged by way of messages, held in suspense by way of a file and terrified by way of a rumor, shocked through omens and deluded by means of falsehoods, wearied out with court cases and careworn via contentions even at night." Wow. It is going on, yet does so, as Zeitlin notes, in redundant fashion. yet still. it really is good. Book Two. 3 Stars. This part is just too Catholic for my brain. Petrarch describes the categories of solitude of a long way too many saints and popes. The solitude of Saint Remigius, blessed Bernard, Francis, Florentius, Jesus (and many many more). a bit dull. i love the castigating sections on a number of princes, and terrible Ovid. I additionally stumbled on Petrarch's exam of "Hindoos" and Brahmins and people of the "Hyperborean race" attention-grabbing from La vie solitaire an ancient perspective. He writes: "these Hyperboreans are acknowledged to have virtually a similar behavior because the La vie solitaire males of India, other than that because of the extra inclement sky i don't think of their going naked. yet they've got an identical obnoxious perform of voluntary death, although the style of loss of life is different. For whereas the Hindoos input the flames, those people, after they are invaded no longer through weariness however the satiety of lifestyles and the will of

death, enhance themselves with wreaths and cross forth as to a pleased and festive rite and hurl themselves from a steep rock into the within sight waves of the ocean." Otherwise, they seem to be a natural and excellent people. Nakedness and suicide will not be deal killers for Petrarch, as the Hyperboreans are fanatics of solitude. I loved analyzing this, even though the dusty pages *La vie solitaire* made me suppose asthmatic. It used to be various and anciently groovy.
